

Diesel Fuel Surcharge

nox Austria GmbH

Diesel Fuel Surcharge

The dramatic rise in prices for crude oil and fuel presents us with new challenges. nox Austria GmbH offers this to a mutually beneficial and cost-effective solution.

In order to create the greatest possible transparency and sharing the benefits with falling diesel fuel prices to our customers, we have introduced as part of the applicable tariff a variable fuel surcharge. This is monthly adjusted based on an index on the the average monthly diesel prices, calculated by the Federal Ministry of Economy, Family and Youth.

The surcharge is the result based on the previous month. The underlying assembly of fuel costs please find enclosed:
